Exam

Before the Course Starts

Please check Bruin Learn under “Syllabus” for the more detailed Class Syllabus.

General notes on the textbook:

- “Microeconomics” by Goolsbee, Levitt, Syverson (4th edition). See the different purchase options in the class syllabus.
- The “Figure it out” boxes in each chapter should be considered as advanced (voluntary) readings.
- For additional and optional practice, you can find review questions at the end of each chapter (with answers at the end of the textbook).

Optional pre-class training: If you feel you could use a math refresher before the class, I suggest:

- Take the [Math Quiz](#) (10 – 15 min)
- Watch the [Math Review Videos](#)
- Textbook reading: Math review Appendix Section 1 + Section 2 (only first derivatives)
- Achieve: the first section of the Achieve course provides math and graphing video tutorials
